Project Description:	Vergennes North will be a new 74-unit housing development specifically targeting residents of middle income.	Maple Broadband is working to ensure that every on-grid address within the communications union district has access to high-speed broadband.	Bristol will replace its entire municipal water system, including mains, service lines, and supporting infrastructure, to eliminate system failures and secure long-term reliability.	This project upgrades the Middlebury Wastewater Treatment Facility and Main Pump Station to modernize obsolete infrastructure, reduce environmental impacts, and increase energy efficiency.	The goal of this project is to develop a new municipal supply to support the growing demands of the Town. The project will site the additional source, complete the engineering and construct the additional source.	The goal of this project is to make improvements to the water distribution network on Exchange Street to increase reliability and provide redundancy for maintenance.	ADA accessibility improvements to the Vergennes Opera House/City Hall.	This project includes renovating a historic garage into an apartment, and a cafe and general store. This will require renovation costs, and start up expenses for the general store and cafe.	The Middlebury Skatepark Project and The Town of Middlebury are working together to bring a contemporary concrete skatepark to Recreation Park in downtown Middlebury.	The Orwell Store Community Trust will acquire and rehabilitate the former Buxton's Store building at 499 Main Street to restore a year-round general store and café in Orwell Village.
